

Object: Letter of Appreciation for Keynetic srl

Dear Gian Paolo,

I would like to thank you for all of the hard work and professional efforts that you and your team put into the Audio Video and Network electronics for our Benetti BO 107 Oasis.

We worked together to create a functional system and you executed with exceptional results!

The wiring quality is superb as well as the organization of the A/V racks. The audio and video quality is amazing and you continued to work hard to make everything to 100% complete satisfaction. The detailed work of labeling wires and making sure equipment was set up properly were labor intensive and you completed this with pride. You and your team were technically strong and always enthusiastic. The boat audio video, network, and electronics all work great.

It was great working with you and your team. We will definitely engage you in the future as well as highly recommend your company's services to anyone we know.

2022, the 6th December
